

Brief Instruction for New Love Droplet Readers

The celestial messages that the spirit of love has given warm-hearted people for their spiritual reorientation in droplets over two decades also describe the fall of apostate celestial beings. The spirit of love has tirelessly tried to help spiritually open-minded people to understand events at a cosmic level that led to the emergence of material worlds. It also explains why this world and people were not created by God, the universal impersonal spirit of love, or by pure celestial beings. It illustrates droplet by droplet why a heavenly rescue plan for creation and fallen beings became necessary and how it was implemented by celestial beings in their free will.

Some details of this knowledge have already been acquired from the spirit of love by spiritually-oriented people in the earth's past through other heralds, but the essential, clear explanations and descriptions have not yet been revealed, as it has not been possible on Earth to transmit this knowledge through the human consciousness of other heralds. For example, there are explanations of the heavenly creation, what induced apostate beings to leave heaven many cosmic ages ago to create non-celestial worlds, and why they will return to their heavenly selves some day. The heralds lacked the important building blocks of knowledge from the heavenly evolution of ethereal beings of light that would have given them a more well-rounded and profound understanding of the connections between the regularities and particle functions in the material and ethereal cosmic realms.

The love-droplet messages from the divine celestial source that come from this spiritually independent and free herald not belonging to any religion or interest group can be very valuable for the spiritual advancement of kind-hearted people and their souls, as the spirit of love offers them a lot of helpful pointers for self-awareness and the refinement of their unpleasant character traits. Through spiritual reorientation and an implementation of this knowledge in their daily lives, it would now well be possible for them to come many spiritual steps closer to the impersonal heavenly spirit of love — God — and to eternal heavenly life.

The universal spirit of love and the celestial beings would rejoice greatly if this were to happen. Would you like to be among the people who are spiritually receptive, enlightened, and happy at heart?
